Release Notes

1. Introduction

The document communicates the major new features and changes in this pre-release of KenyaEMR. It also documents known problems and workarounds.

2. About This Release

TaifaCare v19.3.2 includes key enhancements aimed at improving data accuracy, reporting compliance, system stability, and user experience across facilities such as:

- PrEP Module Enhancements (Guideline Alignment)
- Case Surveillance

3. Compatible Products

This product has been tested on the following platforms or with the following products:

OpenMRS warfile 2.6.15 and MySQL 8.0

This version works with DWAPI v3.1.48 tag

4. Upgrades

Refer to the upgrade user manual on how to upgrade your instance of KenyaEMR.

5. PrEP Module Enhancements (Guideline Alignment)

PrEP forms and workflows have been enhanced to align with the current national guidelines, including updates to dosing strategies, PrEP types, and reporting variables. The form enhancements include

- Consolidated PrEP forms into one PrEP clinical form.

6. Case Surveillance

- Added dataset for Virally Unsuppressed linelist
- Introduced queueing for case surveillance variables
- Improved fault tolerance during data extraction and transmission

7. Reporting

- Enhanced TX_CURR report: Added VL due date and VL results date.
- Simplified VL eligibility logic and reporting
- Added Malaria features:
- PCR testing support
- Monthly commodities summary report
- Updated MOH 705 indicators
